

A Month-long Program by
ZOOM Starting from 10th
Oct October 2020
UTC10:00 am

Breakthrough Thinking has been evolving for past 60 years, Dr. Hibino will introduce the recent version of Extraordinary Breakthrough Thinking with Thinking Building Model. They are including Four Philosophies Four Phases Several Tools as a mind software for installing into our brain. **Prof. Shozo Hibino, Ph.D., Founder of Breakthrough Thinking, World Premier, EBT 3.1, Key Note Speech, October 10**

The Shingo Prize for Operational Excellence has been called the Pulitzer Prize for operational excellence and is based on Shigeo Shingo's model for Cultural Transformation and Sustainable Continuous Improvement (<https://Shingo.org>). Its model and methodology is recognized internationally as the standard for Enterprise Excellence. It promotes and fosters creativity. The Breakthrough Thinking paradigm is a world class methodology for creativity and strengthens the Shingo methodology, and the two need to work closely together to help industry leapfrog ahead of it's competition. This presentation will introduce the Shingo Model, it's methodology, and how Breakthrough Thinking strengthens organizations into becoming creative power houses. **Dr. Gerhard Plenert, USA Strengthening the Shingo Model, October 17**

All phenomena in the world is a reflection of human mind and consciousness based on how to see and think of various event and issues. Its phenomena depends on his or her specialty and past experience. BT really challenge to change their mind and attitude to find out directions following 7 principals and resonance styles among probable concerns and people including leader too. *Deductionism* does not find creative and resonant solution. Human mind organization and culture are strongly established and it might hinder for people to change their mind attitude even though they try to follow BT because BT approach essence of matters, it might reconsider way of thinking and viewpoints. Furthermore, leadership mind has a pivotal role to change organization, management, staff's mind and society. Leadership and BT should have strong resonance to develop the new normal.

Shuheii ANAN, Former President of Sri Lanka Telecom BT Cases at Sri Lanka Telecom, October 31

The Breakthrough Thinking purpose hierarchy is a groundbreaking tool that leads users to better solutions, not only in their professional and organizational environments, but also in daily life. In this presentation we will share examples of how people have used purpose hierarchies to navigate career changes and mid-life crises as well as make decisions that improve their general wellbeing. The examples are based on true stories; however they are not recommendations for specific solutions. Instead, we will use the stories to demonstrate a systematic method of exploring the possibilities we all tend to overlook. **Dr. Nachum Kaminka Breakthrough Thinking in daily life, October 24**

"OKR is a simple planning and engaging goals setting and making end-results framework, originally rooted from MBO (Management By Objectives) and put in use by Andy Grove (ex CEO of Intel). OKR stands for Objectives and Key Results, request a discipline in thinking to define clearly the What (Objective) and How (Key Results), and now is being used widely by the world's leading companies such as Google, Amazon, General Electric, Deloitte, Samsung, etc. However, the key problem that managers met is how to generate the right OKRs. As in our best practices, putting uniqueness and purpose expansion principles is a highly effective way to foster OKR generation as it sticks to the nature of problem solving

Luu Nhat Huy ,Presentation on "Blended approach: using breakthrough thinking to generate better OKRs," October 17
